

Yair Ballinas

Houston, TX | (713) 277-4156 | ballinasyair@gmail.com | [GitHub](#)

SUMMARY

Software Engineer with a background in Python, JavaScript, C++, HTML5 and CSS3, and experience using Git for collaborative development. Skilled at building maintainable web applications and automating data processes. Demonstrated leadership and communication through training and guiding team members in high-volume retail operations, seeking to transition these skills to full-stack development.

WORK EXPERIENCE

H-E-B

Healthy Living Lead

Houston, TX · Feb 2024 - Present

- Assist in product merchandising and inventory management to ensure that healthy options are prominently displayed and available for customers.
- Conduct regular inventory audits to track product freshness and ensure that all items adhere to quality standards before being shelved.
- Provide nutrition education and guidance to customers to help them make informed choices about their food selections.

Curbside In-Store Shopper

Houston, TX · Dec 2019 - Feb 2024

- Trained new team members on operational procedures and best practices to maintain high service standards.
- Provide exceptional customer service by assisting shoppers with their orders and ensuring accurate item selection and substitution.
- Coordinated with store departments to enhance the efficiency of order fulfillment processes for both curbside and in-store shoppers.

EDUCATION

University of Houston - Downtown

Bachelor of Science, Computer Science, Mathematics Minor

May 2025

Houston, TX

Wharton County Junior College

Associate Degree, Computer Science

Dec 2019

Richmond, TX

PROJECTS

TaskFlow - Full Stack Management Application | [Demo](#)

- Developed a full-stack application with React, Flask, SQLAlchemy with JWT Authentication, category organization, real-time search and analytics dashboard.
- Built responsive UI with Tailwind CSS displaying task statistics including completion rates and priority breakdowns.
- Deployed backend on React and frontend with Vercel and CORS configuration for cross-origin requests.

Weather Forecast Application | [Demo](#)

- Developed a responsive weather app with real-time data for 200k+ cities, 5-day forecasts, and auto-location detection using Geolocation API with reverse geocoding.
- Optimized API performance with Promise.all() for parallel fetching and implemented CSS Grid/Flexbox for responsive design.
- Deployed to Vercel with GitHub CI/CD pipeline, achieving sub-second load times via global CDN and a 99.9% uptime.
